FOREWORD

While global economic uncertainties have persisted, the rebalancing in domestic economic activity has continued since the previous volume of the Financial Stability Report. The risks to financial stability posed by multiple shocks have been mitigated by monetary policy actions and coordinated policy measures. The Central Bank of the Republic of Turkey will continue to use all available instruments to achieve price stability and to support financial stability in the upcoming period.

I hope that the 27th volume of the Financial Stability Report, which includes the global and domestic macro financial outlook in addition to the recent developments regarding financial stability, will be of benefit to all readers.
