# FINANCIAL INTERMEDIATION AND LOANS DEVELOPMENTS

# Total Loans\*

(Year on Year Change, %)

Source: CBRT

Last Observation: May 24, 2024

Due to exchange rate movements and changes in TRY- FX loan weights and the currency composition of FX loans, the exchange rate adjustment methodology was updated with the aim to form a more representative total loan growth indicator. The total FX-adjusted credit rate growth is calculated using the change in TL loans and the change in FX (in terms of currency basket) loans multiplied by the period average of the exchange rate basket. [For the technical note on the exchange rate adjustment methodology, please see.](#)

\* Total banking sector (including participation banks). Loans extended to banks excluded. NPLs excluded.

# Commercial and Consumer Loans\*

(Year on Year Change, %)

Source: CBRT

Last Observation: May 24, 2024

# Total Loans\*

(Adjusted for Exchange Rate, Annualized 13-Week Growth, %)

Source: CBRT

Last Observation: May 24, 2024

The total FX-adjusted credit growth is calculated using the change in TL loans and the change in FX (in terms of currency basket) loans multiplied by the period average of the exchange rate basket. [For the technical note on the exchange rate adjustment methodology, please](#)

\* Total banking sector (including participation banks). Loans extended to banks excluded. NPLs excluded.  
13 week growth rate of credit stock, adjusted for exchange rate, is annualized.

# Commercial and Consumer Loans\*

(Adjusted for Exchange Rate, Annualized 13-Week Growth, %)

Source: CBRT

Last Observation: May 24, 2024

The total FX-adjusted credit growth is calculated using the change in TL loans and the change in FX (in terms of currency basket) loans multiplied by the period average of the exchange rate basket. [For the technical note on the exchange rate adjustment methodology, please see.](#)

\* Total banking sector (including participation banks). Loans extended to banks excluded. NPLs excluded.

For commercial loans 13 week growth rate of commercial credit stock which is adjusted for exchange rate and for consumer loans 13 week growth rate of nominal consumer credit stock is annualized.

# Consumer Loans\*

(Annualized 13-Week Growth, %)

Source: CBRT

Last Observation: May 24, 2024

# Total Loans\*

(Adjusted for Exchange Rate, Annualized 13-Week Growth, %)

Source: CBRT

Last Observation: May 24, 2024

The total FX-adjusted credit growth is calculated using the change in TL loans and the change in FX (in terms of currency basket) loans multiplied by the period average of the exchange rate basket. [For the technical note on the exchange rate adjustment methodology, please see.](#)

\* Total banking sector (including participation banks). Loans extended to banks excluded. NPLs excluded.

13 week growth rate of credit stock, adjusted for exchange rate, is annualized.
