

Statistics

Outstanding Loans Received From Abroad by Private Sector

The Data: Coverage, Periodicity and Timeliness

Coverage characteristics

Purpose of the study: With respect to the Article 17 a) of the Decree No. 32 On The Protection Of The Value Of Turkish Currency; long-term credits received from abroad by public institutions and establishments in Turkey, which are mentioned in the second and third paragraphs of this article, are monitored by Ministry of Treasury and Finance; while long-term credits received from abroad by residents in Turkey excluding public institutions and establishments and short-term credits received from abroad by residents in Turkey are monitored by the Central Bank of Turkey.

Data description: Data covers long and short-term loans received from abroad by private sector, which comprise the details on information on borrower and creditor, currency denomination, disbursements, principal/interest payments, repayment schedule and country of creditor.

Statistical concepts and definitions:

Residency

There are two basic concepts in the external debt definition: "economy" and "residence". The concept of "economy" corresponds to a geographic territory administered by a government while the concept of "residence" refers to the institutional unit or an individual who regularly resides and engages in economic activities in an economic territory for more than one year.

External Debt Stock

External debt stock, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to nonresidents by residents of an economy.

Maturity

- Short-term: Original maturity of one year or less.
- Long-term: Original maturity of more than one year.

Interest

- Fixed Rate: Interest rate, which does not change during the life of the instrument as specified in the contractual agreement.
- Variable Rate: Interest rate, which may change during the life of the instrument subject to a reference index as specified in the contractual agreement.

Classification system: Classification described under External Debt Statistics: Guide for Compilers and Users, 2013.

Statistical population: Academicians, public institutions and organizations like Ministry of Treasury and Finance, Ministry of Trade and international institutions like IMF, World Bank and OECD.

Reference area: All Turkey.

Geographical level: None.

Sector coverage: Data covers banks (private banks excluding state banks), nonbank financial corporations (financial leasing, insurance and factoring corporations) and nonfinancial corporations (private enterprises excluding state-owned ones and households).

Time coverage: Concerning the data for outstanding loans received from abroad, the data starts at 2002 for long-term and 2004 for short-term credits. The data presented in tables show the stock values for the given year and month.

Coverage, n.e.s.: None.

Exceptional circumstances on coverage: None.

Statistical unit: Reporting division.

Base period: None.

Reference period: Two previous months.

Unit of measure:

Variable/Indicator	Unit of measure
All Variables	Million US Dollars

Periodicity

Frequency of data collection: Monthly

Frequency of dissemination: Monthly

Timeliness

Average production time for each release of data: 30 days

Time lag - first results (days): 43-45 days

Time lag - final results (days): 43-45 days

Access by the Public

Advance dissemination of release calendar

Link to advance release calendar: Data release calendar is announced to the public in advance. It is published on official website of the Central Bank on the first business day of every year.

The website of the data release calendar: [Data Release Calendar](#)

Data release policy: The institutions and the organizations which are subscribers of the Central Bank are informed about the publication of the related table just after the table is published on the official website of the Central Bank.

Simultaneous release to all interested parties

Simultaneous release: It is released simultaneously.

Contents

I- DEFINITIONS	8
II- COMPILATION OF THE EXTERNAL DEBT OF PRIVATE SECTOR IN TURKEY.....	8
III- COVERAGE AND CLASSIFICATION REGARDING DATA DISSEMINATED UNDER THE MAIN HEADING "OUTSTANDING LOANS RECEIVED FROM ABROAD BY PRIVATE SECTOR"	9

I- DEFINITIONS

Residency

There are two basic concepts in the external debt definition: "**economy**" and "**residence**". The concept of "**economy**" corresponds to a geographic territory administered by a government while the concept of "**residence**" refers to the institutional unit or an individual who regularly resides and engages in economic activities in an economic territory for more than one year.

External Debt Stock

External debt stock, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to nonresidents by residents of an economy.

Maturity

- **Short-term:** Original maturity of one year or less.
- **Long-term:** Original maturity of more than one year.

Interest

- **Fixed Rate:** Interest rate, which does not change during the life of the instrument as specified in the contractual agreement.
- **Variable Rate:** Interest rate, which may change during the life of the instrument subject to a reference index as specified in the contractual agreement.

II- COMPILATION OF THE EXTERNAL DEBT OF PRIVATE SECTOR IN TURKEY

1- Legal Background

With respect to the Article 17 a) of the Decree No. 32 On The Protection Of The Value Of Turkish Currency; long-term credits received from abroad by public institutions and establishments in Turkey, which are mentioned in the second and third paragraphs of this article, are monitored by Ministry of Treasury and Finance ; while long-term credits received from abroad by residents in Turkey excluding public institutions and establishments and short-term credits received from abroad by residents in Turkey are monitored by the Central Bank of Turkey.

2- Compilation Method

Details on long and short-term loans received from abroad by private sector, which comprise information on borrower and creditor, currency denomination, disbursements, principal/interest payments and repayment schedule, are compiled via the intermediary resident banks' transaction basis reporting forms submitted to the Central Bank of Turkey.

The said transactions data are recorded in the Balance of Payments Statistics in compliance with the sixth edition of the Balance of Payments and International Investment Position Manual (BPM6) prepared by the International Monetary Fund (IMF); whereas stocks data, which are derived from the disbursements and repayments and converted to USD by end-of-period exchange rates, are recorded in the International Investment Position and also sent to Ministry of Treasury and Finance to be disseminated in the tables of "Gross External Debt Profile of Turkey" in compliance with the External Debt Statistics Guide for Compilers and Users prepared by the IMF.

III-COVERAGE AND CLASSIFICATION REGARDING DATA DISSEMINATED UNDER THE MAIN HEADING "OUTSTANDING LOANS RECEIVED FROM ABROAD BY PRIVATE SECTOR"

1- Coverage

- Outstanding Long-Term Loans Received From Abroad By Private Sector

Long-term loans and trade credits (except for the cash against delivery and acceptance credits types of payments in import financing) received from abroad and bond issues abroad by the private banks, nonbank financial corporations, nonfinancial corporations (excluding State Owned Enterprises) and households are included.

- Outstanding Short-Term Loans Received From Abroad By Private Sector

Short-term loans received from abroad by private banks, private nonbank financial corporations, nonfinancial corporations (excluding State Owned Enterprises) and households are included.

- Repayment Projections of Outstanding Loans Received From Abroad by Private Sector for the Next 12 Months

Regarding the loans received from abroad by private banks, private nonbank financial corporations, nonfinancial corporations (excluding State Owned Enterprises) and households, repayment projections of the long term loans for the next 12 months along with the repayment projections of the short-term loans are presented.

2- Classifications

a- By Borrower

i- Financial

- Banks: Private banks are included (Public banks are not included).
- Nonbank Financial Institutions: Financial Leasing, Insurance and Factoring companies are included.

ii- Nonfinancial: Private companies excluding State Owned Enterprises and households are included.

b- By Type

- **Loans:** Consists of funds directly lent by a nonresident creditor to a resident debtor on contractual terms with fixed or variable interest rates.
- **Bonds:** Consists of debt securities issued abroad by residents with fixed interest rates or variable interest rates specified on a contractual basis.
- **Loans Received From Parent Companies and Affiliates:** Consists of loans received by the resident enterprise from the nonresident parent enterprise which owns 10 percent or more of the shares in the resident enterprise and loans received by the resident enterprise from its nonresident affiliates.
- **Trade Credits:** Consists of liabilities arising from the direct extension of credit by suppliers (importers) to buyers (exporters) for transactions in goods. Trade- related loans provided by a third party, such as a bank, to an exporter are not included in this category but under "Loans".
