Pillars of the new strategic management of CBT

1. **Leverage**: *Use of more equity and less borrowing*
2. **Maturity of Liabilities**: *Closing the duration gap and extending the maturities of domestic and foreign borrowing and deposits*
3. **FX Positions**: *Strengthening FX positions of both public and private sectors*
4. **Risk Management**: *More effective management of exchange rate risk via instruments such as Turkish Derivatives Exchange*

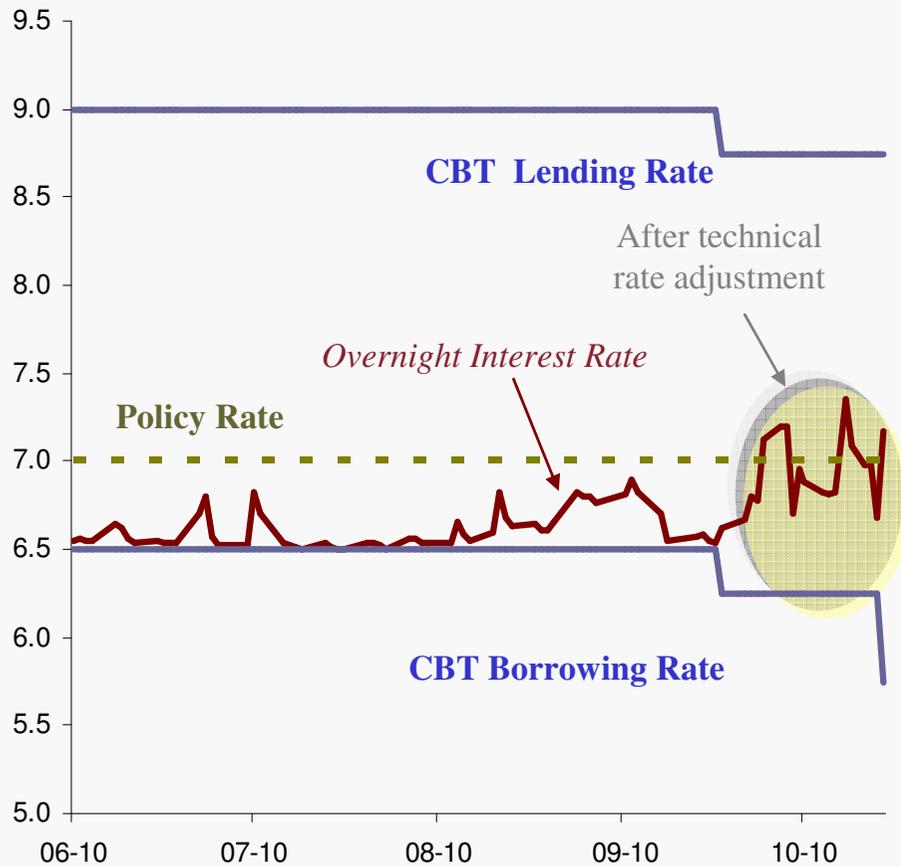

Recent policy actions of the CBT

1. Technical rate adjustment and corridor system for better liquidity management (*September 18, 2010*)
2. Rise in required reserve ratios (*September 23, 2010*)
3. No interest payments on required reserves (*September 23, 2010*)
4. A more flexible mechanism for FX reserve accumulation (*October 4, 2010*)
5. End of 3-month repo auction facility (*October 14, 2010*)
6. 0.5 Reduction in CBT borrowing rate (*October 14, 2010*)

Corridor system and FX purchases

(Jan 2008 – Oct 2010, billion TL)

Source: CBT

Overall Assessment

- **Economic activity has been recovering gradually --- no signs of overheating.**
- **Headwinds from food prices are likely to be transitory, core inflation remains subdued, inflation expectations are stable.**
- **The additional measures we have taken recently should be perceived as a preparation for the new economic environment shaped by intensive capital flows to EMs and high CAD.**
- **Policy rates would be maintained at current levels for some time, and kept at low levels for a long period.**
- **CBT will continue to take measures to enhance the resilience of the economy against the financial risks that we may be exposed to in the medium term.**

Basel III and the Banking Sector in Turkey

July 2010	Turkish Banking Sector (%)	Minimum plus Buffer (2019) (%)
Core Tier I Capital (4.5 %)	16.8	7.0
Core Capital (6 %)	17.4	8.5
Capital Adequacy Ratio (8 %)	19.3	10.5
Leverage Ratio (3 %)	6.4	3.0
