

# Revision Policy for Monthly Money and Banking Statistics

Data Governance and Statistics Department

May, 2024

Revisions to Monthly Money and Banking Statistics are made in two ways according to the following rules:

## 1. Routine Revisions:

- The last data is published as provisional and finalized in the following month.
- FX-protected FX-/gold-converted deposit/participation (DDKMM) and FX-protected Turkish lira deposit/participation (TL KMM) accounts data are cash-based and subject to revision due to retrospective nettings with the banks.

## 2. Non-Routine Revisions:

- If there is an update in the source data, the data of previous months can be revised regardless of the above-mentioned routine revision periods.
- Review of reporting forms of banks, design of new models, methodological changes, and application of new sources of statistics are among the reasons for non-routine revisions. In this context, all unplanned important revisions are announced on the website of the CBRT at least three days prior to the publication of revised statistics. The announcement presents the coverage of and the reasons for the revision.
