An analysis of the domestic economy's financial balance sheets by sectors for 2024Q1 reveals that the total economy was a financial borrower, households and the rest of the world were creditors, and non-financial corporations and the general government were debtors. Meanwhile, due to their financial intermediation activities, financial corporations generated a near-balanced financial net worth (Table 1, Chart 1).

²Pursuant to the methodology, there is a difference between the financial net worth of total domestic economy and rest of the world, since there is no counterpart sector for monetary gold. The rest of the world has been reported based on residency, so as to be compatible with the International Investment Position Statistics.

³ The households sector also covers non-profit institutions serving households.
